SCHLECHT UND PARTNER
SCHLECHT UND COLLEGEN

Our Partnership

SCHLECHT UND PARTNER | SCHLECHT UND COLLEGEN are experienced Auditors, Accountants, Tax Advisors and Business Consultants. Our partnership relies on a long-term cooperation and a common understanding of the needs of a state-of-the-art client service and project consulting.

We advise entrepreneurs, companies as well as individuals in all business and tax matters and conduct audits for medium-sized companies on a variety of occasions and issues. Based on our broad technical and industry expertise, we have a vast experience in SME consulting.

SCHLECHT UND PARTNER | SCHLECHT UND COLLEGEN bundle different specializations and form a powerful team in complex consulting engagements.

Personal Competence

We are dedicated to a high level of expertise, what we ensure through continuous education and coordination as well as exchange with other professional colleagues. In addition to our focus on expert knowledge, it is our belief, that we can only be a reliable and competent partner for our clients, if we emphasize our entrepreneurial and social competence.

Integrated, Interdisciplinary, Individual

Our service approach both represents the conceptual development as well as the application of the relevant processes and measures.

Within interdisciplinary teams, we develop solutions and approaches to problems, which we actively apply and monitor their success jointly with our clients.

In close coordination with our clients, we develop integrated and individual solutions. The economic and personal expectations and necessities of our clients set the guidelines for our consulting approach.

Preventive Problem Solutions

The fast moving market and competitive environment as well as the continuously changing legal parameters set the requirement for an open and direct dialog between the client and its consultant. Based on our experience and by applying our expert knowledge and methodic expertise, we identify and develop preventive solutions.

Flexibility

It is our core concept, that project and client responsibility is allocated to one partner. Due to this principle, our information and decision processes are straightforward and efficient, ensuring fast and reliable decisions – our proven success factor, which ensures a quick decision and communication in critical circumstances.

Client-Oriented

Our clients are medium-sized, internationally oriented companies from various branches and industries as well as large asset management firms.

1 Audit / Accounting

Schlecht und Collegen are experienced auditors and accountants. Our conviction in the field of auditing and accounting is based on discretion, trust and diligence.

Our core services in the field of auditing and accounting are in the implementation of legally or contractually specified as well as voluntary audits of single-entity and consolidated financial statements based on German GAAP (HGB) as well as International Financial Reporting Standards (IFRS). In addition, we also audit reporting packages in the context of the audit of consolidated financial statements and conduct audit reviews.

In addition to the annual audit of financial statements, there are various other contractual or statutory audits, which require a verification or certification by an independent third-party. Of course, we assist our clients in audits in this context as well.

The understanding of our client and their business represents the starting-point of our audit and accounting services. In this regard, we analyze and evaluate the economic and legal environment, the inherent business risks, the internal control systems as well as the risk management approach of our clients. Based on the conclusions gathered in this process, we develop a unique and client-specific risk-oriented audit approach. We always keep the entire value chain of our clients in mind – not just the accounting part of it.

As modern auditors, our experts offer you more than a mere compliance check of your accounting structures by rather applying a holistic risk-oriented auditing approach, paired with an efficient communication and decision process of our proven and stable audit teams. The structured procedures of our auditors ensure an effective and efficient audit process – in the interest of our clients.

The duties designated by law to public accounts (gesetzliche Vorbehaltsaufgaben) are performed by Schlecht und Collegen audit GmbH.

Tax Advisory

Taxation as the determining framework and key influencing factor for business as well as private decisions.

Almost every single business decision is directly or indirectly influenced by taxation. The sheer complexity and innumerable legal requirements and provisions, various and differing tax treaties, judicial decisions and numerous administrative guidelines represent a significant challenge for every entrepreneurial engagement and business decision.

But also for wealth and estate planning purposes in the private sphere, the targeted use of tax law instruments is an essential part and a requirement for a long-term and intergenerational preservation of assets.

German Tax Law is characterized by a permanent change and far from a simplistic tax system. Annual recurring changes and legislative initiatives are accompanied by various legislative directives and interpretations of jurisprudence, resulting in an even more complex taxation.

The legislator is increasingly using his right to enact tax legislation retroactively to minimize the possibilities of tax optimization and structuring. In addition to the domestic tax provisions, regularly constitutional and international regulations as well as European Law are to be considered.

This development represents an increasing challenge for the tax consulting and structuring in respect to validity, quality, flexibility and availability.

Reliable and prognostic tax planning by our experts.

We assist our clients comprehensively in all tax related issues.

It is our commitment to be a reliable and foresighted partner to our clients to the background of the increasing change and complexity in domestic and international tax law.

We regard tax consultancy in this context as a confidential and goal-oriented collaboration with our clients, based on long-standing and proven relationships. In our opinion, such a permanent and successful cooperation must be based on a direct relationship and stewardship of one single partner with our clients. We thereby ensure, that interdependencies are identified and tax related issues are addressed comprehensively.

In the field of taxation, we have a special focus on International Taxation, Asset and Company Succession, Private Clients and Private Wealth, Transaction Tax / M&A, Due Diligence as well as providing advice on Structuring and Reorganization.

Business Consulting

Entrepreneurs are decision-makers faced with an ever more increasingly complex environment.

The increasing dynamic of the business environment, the expansive globalization as well as the progressive digitalization are changing more and more business sectors and branches in a fundamental way. Thus, entrepreneurs are faced with new and complex challenges. As a consequence, corporate decision processes require even more a consequent and goal-oriented approach aligned to the available means and respective environment to successfully deal with these developments.

Our experts will help you identify and successfully overcome these challenges.

We support and accompany our clients with innovative and proven solution approaches, to actively confront the issues and challenges of today. We offer our clients a comprehensive consulting approach in the areas of Corporate Finance, Financial and Capital Markets, Taxation, Audit and Accounting.

Beyond the initial cause and occasion for our consulting services, we always take tax, financial and accounting implications into consideration.

Typical consulting services we provide in this respect are Corporate Valuation (please also visit www.corporate-valuation.de), Corporate Restructuring, Reorganization, Company Succession, Going Public, Going Private, Investor Relations and Financial Reporting, Performance Management as well as Controlling and Risk Management.

In addition, we actively assist our clients in any financing issues.

We accompany our clients in our consulting approach comprehensively from the initial analysis, identifying the issue and challenges at hand and developing strategies to overcome them, up to the implementation and subsequent monitoring and control of the measures taken.

We speak the same language as our clients.

Our consulting services are characterized by a very structured approach, which reflects the highest degree of professionalism of the technical quality of our consulting services as well as a reliable and trustworthy collaboration with our clients.

Based on our philosophy and our conviction to a modern and state-of-the-art client relationship management, each client has one permanent and direct partner as the contact person at his side. Our partners and experts have a high degree of practical and industry experience to match the commercial requirements and needs of our clients, especially when it comes to SMEs. Our claim is to provide very personal and individual consulting services which combine top-class quality and practical relevance.

The pressure for action which confronts entrepreneurs as well as CFOs in the financial sphere rises on a daily basis.

Let us develop solutions for the challenges of today – together with us at your side.

Core Consulting Services

SCHLECHT UND PARTNER | SCHLECHT UND COLLEGEN bundle expert and specialist knowledge.

In addition to providing our clients with an extensive and full spectrum of services, we also provide our expert knowledge and expertise in ongoing client relations as well as in (interdisciplinary) projects.

We also have a vast experience of assisting professional colleagues of other partnerships – whether it be with trustworthy support for special projects or with expert opinions (second opinion).
